

THE FIRE KNIGHT

Welcome to The Fire Knight
Your Trusted Fire Protection Company

Your safety is our priority

Intelligent Fire Detection

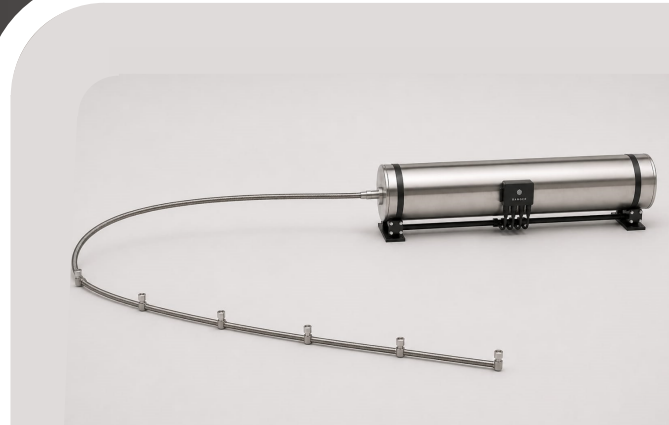

THE FIRE KNIGHT

THE FIRE KNIGHT

Introducing Ranger;
An advanced fire detection and suppression system engineered for vehicles, industrial machinery, mining equipment, engine bays, and enclosed electrical environments.

Built for demanding conditions, Ranger combines intelligent electronics, industrial-grade engineering, and rapid automatic suppression technology designed to assist in suppressing fires before they escalate.

Using advanced detection technologies including PT100 temperature monitoring, Linear Heat Detection (LHD) cable integration, environmental profiling, pressure monitoring, and manual activation capability, Ranger rapidly identifies developing fire conditions while minimizing false alarms.

Designed for trucks, buses, mining equipment, industrial machinery, generators, and electrical enclosures, Ranger delivers fast, intelligent fire protection where reliability matters most.

Built with marine-grade stainless steel components and battery backup capability, Ranger is designed to continue operating during power interruptions and harsh operating environments.

Additional safety features, including audible alarms and emergency lighting, help improve operator awareness and visibility during critical situations.

Designed and tested to recognized industry standards, Ranger delivers confidence, reliability, and peace of mind in demanding environments.
